## **Office Hours**

Monday to Friday 8.30am to 5.00pm

(Special arrangements may be made if these hours are unsuitable)

All offices are wheelchair accessible.

## **Alternative Media Publications**

Special arrangements can be made for our publications to be provided in large print or an alternative media format. If you require this service, please contact the Executive Branch via 02 9289 4000.

## **Note**

In this document, councils are referred to by an abbreviation of their local government area name only. A council's full local government area name or corporate name may vary from that shown here.

## **Disclaimer**

The material contained in this publication is based upon information provided to the Division by councils and drawn from a variety of sources. While every effort has been made to ensure the accuracy of the information in this publication, the Division of Local Government expressly disclaims any liability to any person in respect of anything done or not done as a result of the contents of the publication or the data provided.

## Foreword by Minister

The Local Government Act 1993 gives councils significant responsibility and autonomy in providing services for their communities. It is important that these services meet the needs of the local community and are provided effectively, efficiently and equitably.

This publication provides comparative information on the performance of all local councils in NSW. It is designed to help both the community and councils assess the performance of their council across a broad range of activities. You can, for example, see whether your council's performance has improved over the last three years and compare its performance with that of other councils. This enhanced transparency and public accountability helps to develop performance benchmarks and industry best practice models. A review of the publication process and content was conducted during 2008/09. As a result, with the staged introduction of the Government's Integrated Planning and Reporting reforms, reporting on councils' social plans has been removed from the publication. It is anticipated this indicator will be replaced with an indicator of councils' compliance with the reforms, once all councils have implemented the changes by 2012/13.

It is important to remember that the key performance indicators, when used on their own, do not give the full picture of a council's performance. Although they show the differences between councils across a selection of specific activities, they do not explain why these differences have arisen. The figures are indicators only and conclusions should not be drawn without qualitative assessments being made. If you need further details or explanations, please contact your local council.

I would like to thank all the councils for their cooperation in providing the information and Division of Local Government staff for compiling this excellent resource.

A handwritten signature in blue ink that reads "Barbara Perry".

The Hon Barbara Perry MP

### **Symbols used in this document**

---

**N/A** Not applicable where a council's results have been separated into more than one DLG group due to the council changing DLG group within the three year reporting period.

- Applies to KPI 1.2 where there is no result because a council has no farmland.

**No Data** Applies where a council failed to submit, or failed to submit within the deadline, a financial data return, or statement of compliance, to the Division.

# What you will find

This publication is divided into two parts.

## Part A includes:

- an introduction
- an explanation of how we have grouped councils
- a profile of each council in alphabetical order
- information about how we collected and analysed the data
- summary of NSW results for 2008/09
- maps

## Part B includes detailed performance information for each council over the last three years. This information is divided into the following categories:

- rating
- financial
- corporate
- environmental management and health services
- recreation and leisure services
- community services

Each category has its own key performance indicator(s). For each key performance indicator there is:

- an introductory section explaining how the indicator is calculated
- an analysis of comparative performance for 2006/07, 2007/08 and 2008/09
- detailed results for each council

## Source data

The source data for this publication is available from the Division's homepage at [www.dlg.nsw.gov.au](http://www.dlg.nsw.gov.au) - click on the publications area, and the Comparative Information link.

## How to find the information you want

If you want to check your local council's performance in, for example, compliance with statutory reporting deadlines, you need to:

### Step 1

Find your council in the alphabetical list of councils on pages 14-17 in Part A

**TABLE A2** Profile of council area in alphabetical order

### Step 2

Check which group your council is in. For instance, Bankstown is in Group 3.

## **Part A**

# Introduction

This publication contains 2006/07, 2007/08 and 2008/09 comparative performance information for all councils in New South Wales. It is the 19th edition and builds on past publications.

The key performance indicators have been chosen to monitor performance across a broad spectrum of activities and are kept under regular review.

When assessing or comparing the performance of councils, it is important to remember that local circumstances can influence how well a council provides its services. There are often good reasons why it is harder or more costly to provide certain services in some local government areas than in others or why a different mix of services may be delivered. In some cases, councils may have made conscious decisions to provide lower or higher levels of services depending on local needs. The council profiles will help you assess the comparative performance information.

## Classification and grouping of councils

The Australian Classification of Local Governments (ACLG) classifies councils into 22 categories according to their socioeconomic characteristics and their capacity to deliver a range of services to the community.

Councils are first classified as either urban or rural. Urban councils are then divided into four categories – capital city, metropolitan developed, regional town/city or fringe. Rural councils are divided into three categories – significant growth, agricultural or remote. The final classification step for both urban and rural councils is based on population.

Each council is given a numerical category and a three letter based alpha code. For example 2 (UDS) means the council is urban, metropolitan developed and small and in category two.

Table A1 explains the Australian classification system in more detail.

In this publication, we have put NSW councils into 11 groups or categories instead of 22. This is because several of the ACLG categories contained either no NSW councils or only one or two councils. This made it difficult to compare the performance of different councils in a meaningful way. It should be noted however, that the groupings are based on broad demographic variables. As a result, there are often large differences between councils in the same group. This information should not be relied upon by councils to argue for individual policy changes.

The estimated resident population within council boundaries is the preliminary figure calculated by the ABS for 30 June 2008. This figure was used to determine the ACLG categories for the 2008/09 publication.

## Table A1 - Australian Classification of Local Government and DLG group numbers

Step 1	Step 2	Step 3	Category	Alpha	DLG group No.
<b>URBAN (U)</b>					
	<b>Capital City (CC)</b>	Not applicable	1	UCC	1
Pop. > 20,000	<b>Metropolitan Developed (D)</b>	Small (S) up to 30,000 Medium (M) 30,001-70,000 Part of an urban centre > 1,000,000 and pop. density > 600/sq km.	2 3 4 5	UDS UDM UDL UDV	2 3 3
or Pop. density > 30 persons per sq km	<b>Regional Town/City (R)</b>	Small up to 30,000 Medium 30,001-70,000 Part of an urban centre with population < 1,000,000 and predominantly urban in nature.	6 7 8 9	URS URM URL URV	4 4 5 5
or >90% of LGA population is urban	<b>Fringe (F)</b>	Small up to 30,000 Medium 30,001-70,000 A developing LGA on the margin of a developed or regional urban centre.	10 11 12 13	UFS UFM UFL UFV	6 6 7 7
<b>RURAL (R)</b>					
	<b>Significant Growth (SG)</b>	Not applicable	14	RSG	N/A
	Average annual Population growth > 3%, population > 5,000 and not remote.				
	<b>Agricultural (A)</b>	Small Up to 2,000 Medium 2,001-5,000 Large 5,001,-10,000 Very large 10,001 to 20,000	15 16 17 18	RAS RAM RAL RAV	8 9 10 11
	<b>Remote (T)</b> Situated in a remote locality.	Extra small Up to 400 Small 401-1,000 Medium 1,001-3,000 Large 3,001 to 20,000	19 20 21 22	RTX RTS RTM RTL	N/A N/A 9 10

Note: For "Rural Agricultural Very Large" (RAV), "Rural Remote Large" (RTL), and "Rural Significant Growth" (RSG), 20,000 is the upper limit because beyond this number all local governments are deemed "Urban".

## Council profiles

This section contains a profile for each council to help you assess the comparative performance information.

Some of the circumstances that can influence council services include:

- estimated resident population – this shows the number of people that the council provides services for and gives a general indication of infrastructure requirements.
- area (sq km) – this gives an indication of the size of the local government area that the council has to administer. It does not include harbours, rivers etc.
- population density – this figure is obtained by dividing the estimated resident population by the area. It gives an indication of a council's ability to achieve, for example, economies of scale.
- population growth – this figure is based on a five year average and may help to explain significant increases or decreases in comparative performance from year to year.
- Aboriginal and Torres Strait Islander (ATSI) population – this figure gives an indication of the diversity of the community in a local government area which may affect the type and level of services the council needs to provide.
- overseas born people of non-English speaking background (NESB) – this figure is based on the ABS definition which is used by the NSW Local Government Grants Commission to calculate grant allocations. It gives a useful indication of community diversity and service delivery requirements.

Table A2 shows the profile for each council in Groups 1-11.

The figures for population and area are taken from the Australian Bureau of Statistics (ABS) publications and census data.

The estimated resident population comes from ABS, Regional Population Growth, 30 June 2008 (preliminary), Catalogue No 3218.0. The figures for the size of the local government areas and five yearly annual average growth are taken from the same publication. However, as a result of population changes, the categories for a number of council areas have subsequently been revised on the basis of information provided by the ABS.

It should be noted that, as a result of population changes, Coffs Harbour City Council moved from DLG Group 4 to Group 5 and Gloucester Shire Council moved from DLG Group 9 to Group 10, which results in apparent errors in previous years' averages in some tables. However, adjustments have been made to the 2008/09 data to ensure their comparability.

The ATSI and NESB population figures come from ABS, 2006 Census – Community Profile Series, Catalogue No 2004.0.

## **Amalgamations and boundary changes**

There were no amalgamations or major boundary changes during 2008/09.

## Data collection and analysis

The accuracy of this publication is largely dependant upon the accuracy and completeness of data returns lodged by councils. It should be noted that 150 out of 152 councils lodged their 2008/09 financial reports at the time of compiling the data for the comparative publication.

The data for the key performance indicators was collected by electronic surveys of councils including 2008/09 financial data return and the Division's rating return/statement of compliance.

The sources of the data include council financial reports, rating records and ABS population statistics.

The Division does not audit the data but we do conduct extensive testing for validity and reasonableness. We consult with councils about the accuracy of their data and each council's General Manager is asked to certify by a certain date that the data is correct.

The group averages and the NSW mean have been calculated using the sum totals of all the raw data for each indicator. For example, the mean for the NSW rate per residential assessment is the total residential rates revenue divided by the total number of residential assessments. The exception is the group average for the number of equivalent full time staff. In this case, the group average is obtained by averaging each council's calculated indicator and dividing by the number of councils in that group.

The NSW median is that value that divides the results into two equal parts. One half of the councils has values lower than the median and one half has values higher than the median. The median can be used rather than the mean when the distribution of the values is skewed.

## **Part B**

**Rating**

# Rating

There are four key performance indicators for rating:

- average rate per assessment
- outstanding rates and annual charges
- percentage movement in rates and annual charges revenue from previous year
- percentage movement in user charges and fees revenue from previous year.

## KEY PERFORMANCE INDICATOR

### 1.1 Average rate per assessment

Rates are an important source of a council's revenue. This indicator highlights the relative level of a council's residential, farmland and business rates. It does not include water and sewerage rates or domestic waste management charges.

The formula used for this indicator is:

$$\frac{\text{Total residential/farmland/business rates revenue}}{\text{Number of rateable residential/farmland/business properties}}$$

Some factors affecting this indicator are:

- the level of reliance on other revenue sources
- rating mix relativities between rating categories
- the mix of residential, farmland and business properties
- revaluation of a council area
- the mix of rates and charges
- any special variations granted
- the level of services provided in an area
- the council's rating structure and policy
- the amount of abandonments for pensioner rebates and other write offs.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

##### Residential

Councils received approximately \$1.95 billion from residential rates in 2008/09. This represents about 47% of total rates and annual charges revenue (excluding mining rates) and 22% of total continuing operations revenue.

In 2008/09, urban councils levied an average residential rate of \$781 compared with rural councils that levied an average of \$490. The overall state average was \$760. In 2007/08, urban councils levied an average residential rate of \$752, rural councils levied an average of \$473 and the overall state average was \$732. This equates to an increase of 3% for urban councils and an increase of 4% for rural councils. The approved general rate increase was 3.5%.

<b>TABLE B1.11</b>	<b>Average rate per residential assessment</b>	\$	\$	\$
NSW Mean		701	732	760
NSW High		1,132	1,168	1,203
NSW Low		92	95	99
NSW Median		587	612	637

## Farmland

Councils received a total of \$195 million from farmland rates in 2008/09. This represents 7% of total rates and annual charges revenue (excluding mining rates) and 2% of total continuing operations revenue. The farmland rate revenue increased by about 4% from 2007/08.

## KEY PERFORMANCE INDICATOR

### 1.4 Outstanding rates and annual charges

This indicator assesses the impact of uncollected rates and annual charges on liquidity and the effectiveness of a council's debt recovery. The percentage of rates and annual charges that are unpaid at the end of a financial year is a measure of how well a council is managing debt recovery.

Rates and annual charges are usually levied at the beginning of the financial year (31 July at the latest). They can be paid as a single amount or in four equal instalments. The final instalment is due by 31 May.

The lower the percentage, the less income is tied up in receivables and the more revenue there is available for council purposes.

The formula used for this indicator is:

$$\frac{\text{Outstanding rates and annual charges} \times 100}{\text{Annual revenue from rates and annual charges collectible}}$$

Some factors affecting this indicator are:

- the council's rating policy
- the level of reliance on other revenue sources
- the level of cash reserves
- cash management and timing of cash flows
- credit management policies
- the socioeconomic characteristics of the area
- the physical size of the council
- environmental factors eg in rural areas drought can adversely affect the ability of ratepayers to meet their obligations on time.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

In 2008/09, councils reported that \$236 million had not been collected from total rates and annual charges revenue of \$4.18 billion. This represents an average outstanding amount of 5.2%. The average amount overdue was 4.9% for urban and coastal councils and 7.7% for rural councils. The Division's accepted benchmarks for outstanding rates are <5% for urban and coastal councils and <10% for rural councils.

TABLE B1.41

		2006/07	2007/08	2008/09

## KEY PERFORMANCE INDICATOR

### 1.5 Percentage movement in rates and annual charges revenue from previous year

This indicator shows the increase or decrease in revenue from rates and annual charges. A council's income from rates and annual charges (except water, sewerage and domestic waste) is limited by the rate-pegging percentage determined by the NSW Government.

If a council can show that special circumstances exist, they may be given Ministerial approval to increase their annual general revenue by more than the general rate-pegging variation. Water and sewerage rates and charges are set by each council and are not limited by rate-pegging. Domestic waste charges are not limited by rate-pegging but they must not exceed the cost of providing the service.

The formula used for this indicator is:

$$\frac{2008/09 \text{ rates and annual charges} - 2007/08 \text{ rates and annual charges}}{2007/08 \text{ rates and annual charges}} \times 100$$

Some factors affecting this indicator are:

- rate-pegging legislation limiting overall rate revenue
- the council's revenue raising policy
- the level of reliance on other revenue sources
- the level of cash reserves
- cash management and timing of cash flows.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

In 2008/09, the movement in revenue from rates and annual charges ranged from an increase of 15.8% to a reduction of -11.9%. The average increase in 2008/09 was 5.0%. This includes increases in water and sewerage rates and charges, which are not subject to rate-pegging. The approved general rate increase in 2008/09 was 3.5%.

These results are affected by changes in councils' rating and charging policies. For example, a council may decide to change from an annual charge for water supply to a two part (access and usage) charging regime.

## KEY PERFORMANCE INDICATOR

### 1.6 Percentage movement in user charges and fees revenue from previous year

This indicator shows the increase or decrease in revenue from user charges and fees. User charges and fees are levied at council's discretion and are not subject to rate-pegging.

The formula used for this indicator is:

$$\frac{2008/09 \text{ user charges and fees} - 2007/08 \text{ user charges and fees}}{2007/08 \text{ user charges and fees}} \times 100$$

Some factors affecting this indicator are:

- the council's revenue policy
- the level of reliance on other revenue sources eg private works
- the level of cash reserves
- cash management and timing of cash flows
- the level of user pays services provided by the council.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

Council income from user charges and fees can include payments for such services as private works, payments from the Roads and Traffic Authority (RTA) for work done by rural councils on its behalf, waste management and caravan parks. Increases and decreases may also be affected by changes in a council's revenue raising policy eg changing from an annual to a user charge for water supply.

During 2008/09, the largest percentage increase in income from user charges and fees was Lockhart Shire Council with 88.4% increase due to a private works road construction project.

	2006/07	2007/08	2008/09
<b>TABLE B1.61</b>	<b>Percentage movement in user charges and fees from previous year</b>	%	%

# Note Council has moved into a new group during the three year period. Group averages for 2008/09 have been adjusted to reflect the change.

## **Financial**

# Financial

There are seven key performance indicators for financial:

- sources of income from continuing operations
- total continuing operations income per capita
- dissection of expenses from continuing operations
- total expenses from continuing operations per capita
- unrestricted current ratio
- debt service ratio
- capital expenditure ratio.

## KEY PERFORMANCE INDICATOR

### 2.1 Sources of income from continuing operations

The main sources of a council's revenue are:

- rates and annual charges
- user charges and fees
- interest
- grants
- contributions
- other revenues e.g. fines, external works, business activities.

Rates and annual charges revenue is generally the most important source of revenue for councils, followed by grant revenue. These sources of revenue are relatively stable from year to year and allow councils to plan and use sound financial budgeting methods to achieve their objectives. User charges are commonly levied on water usage, trade waste and domestic waste management collection. Fees are generally charged for goods or services, providing information and in connection with council's regulatory functions.

This indicator assesses the degree of dependence on alternative sources of revenue, both continuing operations and capital. It shows the different sources of revenue as a percentage of total revenue. It does not include gains from the sale of assets and gains from joint ventures and associates.

The formula used for this indicator is:

$$\frac{Y \times 100}{\text{Total revenue}}$$

Where 'Y' is the source of revenue eg rates and annual charges, user charges and fees, interest, grants (including capital), contributions (including capital) and other revenues.

Some factors affecting this indicator are:

- the level of council's entrepreneurial and investment activity
- the socioeconomic characteristics of the area
- the relative level of Federal/State funding
- new development.

In 2008/09 grants income increased by 2.5%. A contributing factor was an advanced quarterly instalment of Commonwealth General Purpose Financial Assistance Grants worth \$151 million distributed to all NSW councils as part of the Commonwealth Government's Economic Stimulus Package. There will be a corresponding reduction to the grants paid during 2009/10.

**Comparative performance for 2006/07, 2007/08 and 2008/09**

Contributions	9.8	9.7	10.8	
Other revenues	5.1	6.3	4.9	
Total income from continuing operations	100.0	100.0	100.0	

The total dollar amounts between 2006/07 to 2008/09 and the percentages change between 2007/08 and 2008/09 are shown in Table B 2.12.

<b>TABLE B2.12</b>	<b>Sources of income from continuing operations</b>	<b>2006/07</b>	<b>2007/08</b>	<b>2008/09</b>	<b>2008/09</b>
		<b>\$M</b>	<b>\$M</b>	<b>\$M</b>	<b>%</b>
Rates and annual charges	3,750	3,958	4,128	4.3	
User charges and fees	1,309	1,385	1,434	3.5	
Interest#	378	#146	183	25.8	
Grants	1,268	1,297	1,626	25.4	
Contributions	775	785	944	20.2	
Other revenues	398	510	423	-17.2	
Total income from continuing operations	7,878	8,081	8,738	8.1%	

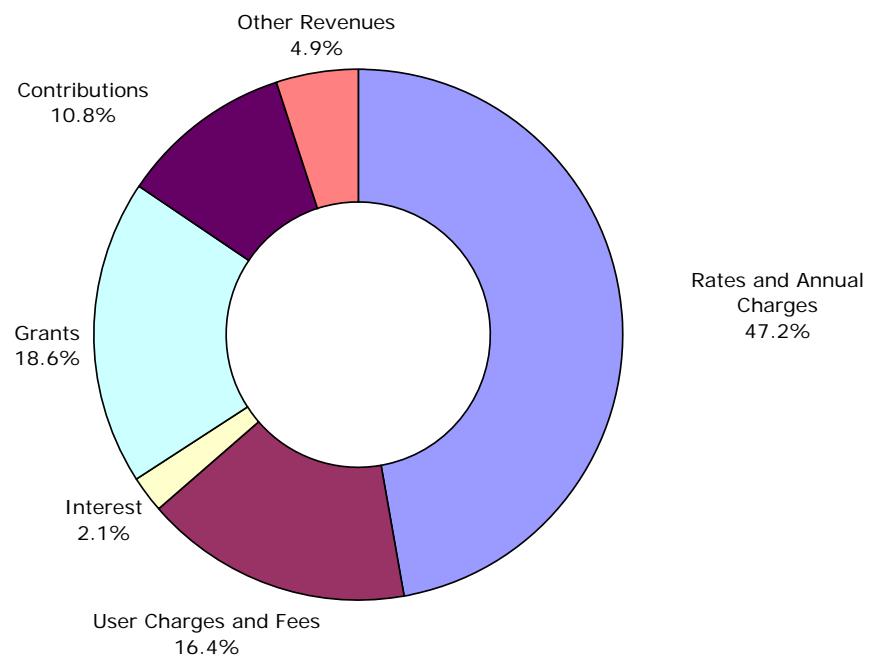

Factors that may have led to changes in rates and annual charges, apart from the approved 3.5% general rate increase, include special variations, supplementary valuations, additional rateable properties, and increases in unpegged rates and charges such as water, sewerage and domestic waste management.

#<sup>1</sup> Note the international financial market instability in 2008 affected the value of some investments. The combination of a decrease in the amount of investment interest received and a decrease in the value of the investments has resulted in a few councils reporting a negative amount for interest and investment revenue from continuing operations for 2008 and 2009.

**Data sources for this indicator:** council financial reports, income statement including capital receipts, excluding gain from sale of assets and interest in joint venture/associates.

Data source for interest and investment revenue: council financial reports, note 3(c).

#<sup>1</sup> Note the international financial market instability in 2008 affected the value of some investments. The combination of a decrease in the amount of investment interest received and a decrease in the value of the investments has resulted in a few councils reporting a negative amount for interest and investment revenue from continuing operations for 2008 and 2009.

#<sup>2</sup> Note Council has moved into a new group during the three year period. Group averages for 2008/09 have been adjusted to reflect the change.

#<sup>1</sup> Note the international financial market instability in 2008 affected the value of some investments. The combination of a decrease in the amount of investment interest received and a decrease in the value of the investments has resulted in a few councils reporting a negative amount for interest and investment revenue from continuing operations for 2008 and 2009.

#<sup>2</sup> Note Council has moved into a new group during the three year period. Group averages for 2008/09 have been adjusted to reflect the change.

#<sup>1</sup> Note the international financial market instability in 2008 affected the value of some investments. The combination of a decrease in the amount of investment interest received and a decrease in the value of the investments has resulted in a few councils reporting a negative amount for interest and investment revenue from continuing operations for 2008 and 2009.

#<sup>2</sup> Note Council has moved into a new group during the three year period. Group averages for 2008/09 have been adjusted to reflect the change.

## KEY PERFORMANCE INDICATOR

### 2.2 Total continuing operations income per capita

Total continuing operations income per capita is another way of analysing revenues received by a council. Revenue depends on the number of people living and working within an area. It is also affected by rate-pegging (rates), development activity (developer contributions) and the extent of user pays type services (charges and fees).

This indicator measures the total continuing operations income before capital per head of population. It shows the revenue available to service the needs of the community. It does not include water and sewerage rates.

The formula used for this indicator is:

$$\frac{\text{Total continuing operations income (including net gain from sale of assets) before capital receipts}}{\text{Estimated resident population within council boundaries}}$$

Some factors affecting this indicator are:

- the level of council's entrepreneurial and investment activity
- the socioeconomic characteristics of the area
- the relative level of Federal/State funding
- the level of new development
- the demographic characteristics of the population.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

Central Darling Shire Council had the highest revenue per capita in 2008/09, while Rockdale City Council had the lowest revenue per capita.

TABLE B2.21	Total continuing operations income per capita	2006/07	2007/08	2008/09
		\$	\$	\$
	NSW Mean	939	985	998
	NSW High	3,616	5,107	5,709
	NSW Low	564	562	588
	NSW Median	1,214	1,228	1,303

**Data sources for this indicator:** council financial reports, income statement excluding water and sewerage from special schedule 1. The estimated resident population within council boundaries is the preliminary figure calculated by the ABS for 30 June 2008.

## KEY PERFORMANCE INDICATOR

### 2.3 Dissection of expenses from continuing operations

This indicator assesses the expenditure patterns of councils.

A council's possible expenditure needs to include:

- employee costs
- materials and contracts
- borrowing costs
- depreciation
- impairment
- other expenses.

Employee costs include wages and salaries (including fringe benefits), annual leave, annual leave loading, long service leave, sick leave, gratuities, post employment benefits other than superannuation and employment oncosts.

Materials and contracts include inputs required to complete work by the council. Anything from gravel for roads to printing and stationery could be included.

Borrowing costs are the interest and other costs that a council incurs in connection with the borrowing of funds.

Depreciation is recognition of the costs of holding an asset that has a limited useful life.

Impairment occurs when the carrying amount of an asset exceeds its recoverable amount.

The indicator does not include loss from the sale of assets and loss from joint venture and associates.

The formula used for this indicator is:

$$\frac{E \times 100}{\text{Total continuing operations expenditure}}$$

Where 'E' is the type of expense eg employee costs, materials and contracts, borrowing costs, depreciation, impairment or other expenses.

Some factors affecting this indicator are:

- the socioeconomic characteristics of the area
- the rate of new development
- the demographic characteristics of the population
- the level of population increase or decrease.

**Comparative performance for 2006/07, 2007/08 and 2008/09**

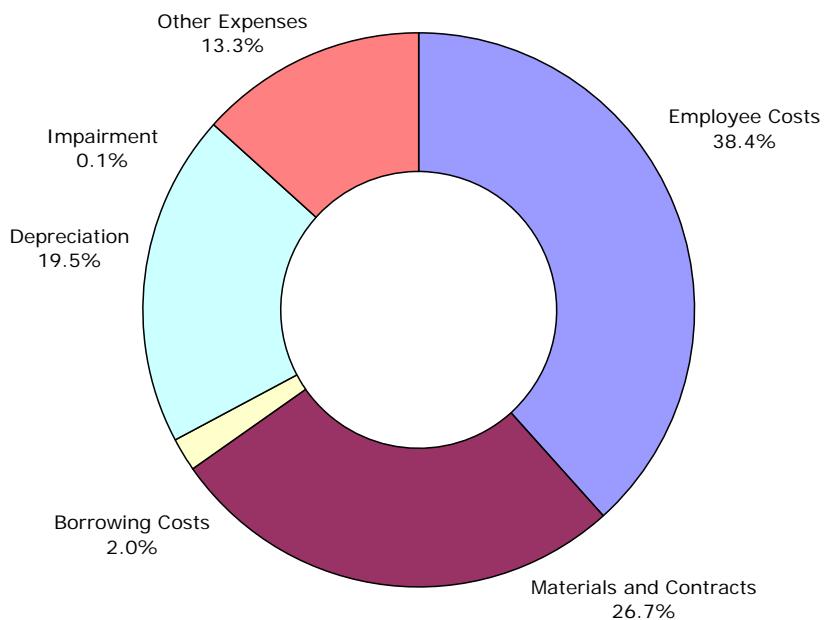

<b>TABLE 2.31</b>	<b>Dissection of expenses from continuing operations</b>	<b>2006/07</b>	<b>2007/08</b>	<b>2008/09</b>
		<b>%</b>	<b>%</b>	<b>%</b>
Employee costs	39.3	38.7	38.4	
Materials and contracts	28.0	27.9	26.7	
Borrowing costs	1.7	1.9	2.0	
Depreciation	18.5	18.6	19.5	
Impairment	0.0	0.0	0.1	
Other expenses	12.5	12.9	13.3	
Total expenses from continuing operations	100.0	100.0	100.0	

The total dollar amounts between 2006/07 to 2008/09 and the percentages change between 2007/08 and 2008/09 are shown in Table B2.32.

**Comparative performance for 2006/07, 2007/08 and 2008/09**

<b>TABLE 2.32</b>	<b>Dissection of expenses from continuing operations</b>	<b>2006/07</b>	<b>2007/08</b>	<b>2008/09</b>	<b>2008/09</b>
		\$'000	\$'000	\$'000	<b>%</b>

## KEY PERFORMANCE INDICATOR

### 2.4 Total expenses from continuing operations per capita

This indicator measures the total expenses from continuing operations per head of population before excluding capital expenditure. It does not include water and sewerage rates.

The formula used for this indicator is:

$$\frac{\text{Total expenses from continuing operations}}{\text{Estimated resident population within council boundaries}}$$

Some factors affecting this indicator are:

- the socioeconomic characteristics of the area
- the rate of new development
- the demographic characteristics of the population
- the level of population increase or decrease.

Dungog Shire Council had the lowest expenses from continuing operations in 2008/09 of \$799.81 per capita due to divesting water and sewer operations to Hunter Water Corporation 1 July 2008 resulting in a loss on disposal of the assets. This distorts the total expenses from continuing operations for KPI 2.4 in 2008/09.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

TABLE B2.41	Total expenses from continuing operations per capita	2006/07	2007/08	2008/09
		\$	\$	\$
	NSW Mean	908	972	1,033
	NSW High	3,961	5,783	6,857
	NSW Low	512	569	-800
	NSW Median	1,181	1,263	1,370

**Data sources for this indicator:** council financial reports, income statement excluding water and sewerage from special schedule 1. The estimated resident population within council boundaries is the preliminary figure calculated by the ABS for 30 June 2008.

## KEY PERFORMANCE INDICATOR

### 2.5 Unrestricted current ratio

This indicator is a measure of a council's ability to meet its financial obligations such as paying for goods and services supplied. It assesses the level of liquidity and the ability to satisfy obligations as they fall due in the short term. A ratio of 1.5:1 indicates that for every dollar in unrestricted current liabilities, the council has \$1.50 in unrestricted current assets on hand to meet the liability. If the ratio is less than 1.5:1, the ratio is unsatisfactory and council may be unable to meet its short term commitments. A ratio of between 1.5:1 and 2:1 is satisfactory and shows that a council has sufficient liquid assets on hand to meet its short term liabilities. A ratio of 2:1 or better is generally viewed by the industry as good.

Unrestricted current assets are those where there is no form of restriction imposed by legislation or some other externally imposed requirement. Restricted current assets have restrictions on their use eg developer contributions, RTA contributions, water and sewerage rates, charges and grants, and domestic waste management charges.

The formula used for this indicator is:

$$\frac{\text{Current assets less all current external restrictions}}{\text{Current liabilities less current specific purpose liabilities}}$$

Some factors affecting this indicator are:

- planning and budgetary controls
- cash management and the timing of cash flows
- the level of restricted assets
- credit management policies and economic circumstances.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

The unrestricted current ratios in NSW ranged from a low of 0.57 (Griffith City Council) to a high of 25.48 (Conargo Shire Council). There were fifteen councils in 2008/09 with a ratio lower than or equal to 1.5:1. In 2008/09, ten of the councils that had a ratio of less than 1.5:1 were urban-based.

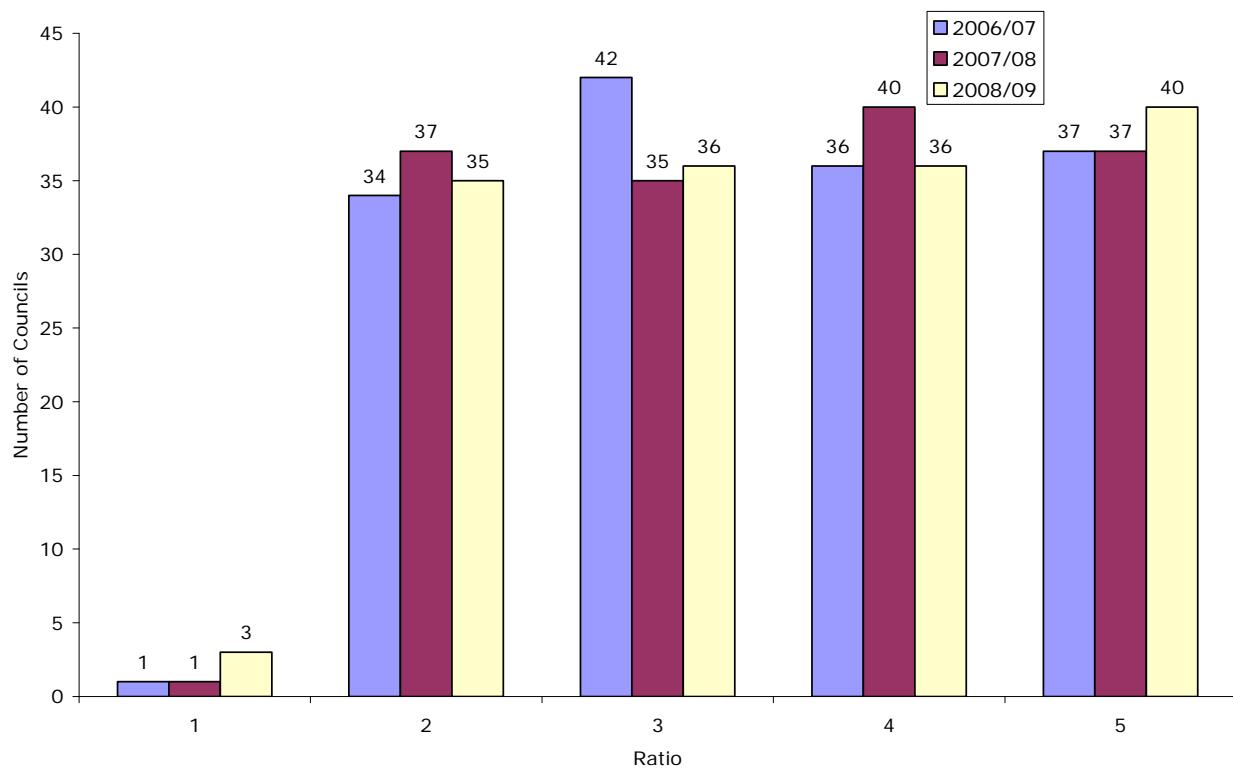

From the eleven categories of councils, group 5 had the lowest average unrestricted current ratio with 2.16, while group 8 had the highest average ratio with 7.29.

#### Percentage of councils in each unrestricted current ratio range

TABLE B2.51

## KEY PERFORMANCE INDICATOR

### 2.6 Debt service ratio

This indicator assesses the degree to which revenues from continuing operations are committed to the repayment of debt. It is generally higher for councils in growth areas where loans have been required to fund infrastructure such as roads and water and sewerage works. The ratio assesses the impact of loan principal and interest repayment on the discretionary revenue of councils. Debt service costs include debt redemption from revenue, transfers to sinking funds and bank overdraft interest.

The Division's accepted benchmark for the debt service ratio is <10% satisfactory, 10% to 20% is fair, and >20% is of concern. High growth coastal councils may have a high debt service ratio. The use of loan funds for infrastructure improvements and other capital purposes is considered to be a prudent financial strategy allowing for contribution to the cost of the asset through its life by the community. When assessing this financial indicator, the ratio may be compared over a number of years in conjunction with other financial performance ratios such as the unrestricted current ratio.

The formula used for this indicator is:

$$\frac{\text{Net debt service cost} \times 100}{\text{Income from continuing operations}}$$

Some factors affecting this indicator are:

- new development
- debt policy
- interest rate movements and loan terms
- capital investment strategies and capital contributions policies
- the level of cash reserves
- the state of infrastructure/life stage of assets
- variations in loan repayments.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

Debt service ratios in NSW in 2008/09 ranged from a low of 0.0%, which indicates that councils had no long term debt or significant revenues committed to servicing long term debt (19 Councils), to a high of 35.65% (Coffs Harbour City Council). 85 councils (57.7%) of the 150 councils had a debt service ratio of less than or equal to 5% and a further 40 councils (27.7%) had a ratio of greater than 5% and less than or equal to 10%. 3 councils (2.0%) had a ratio of greater than 10% and less than or equal to 15% and 3 councils (2%) had a ratio greater than 15%. In 2008/09, the 81 urban councils (groups 1 to 7) had an average debt service ratio of 4.8% compared with the 71 rural councils (groups 8 to 11) who had an average debt service ratio of 3.0%.

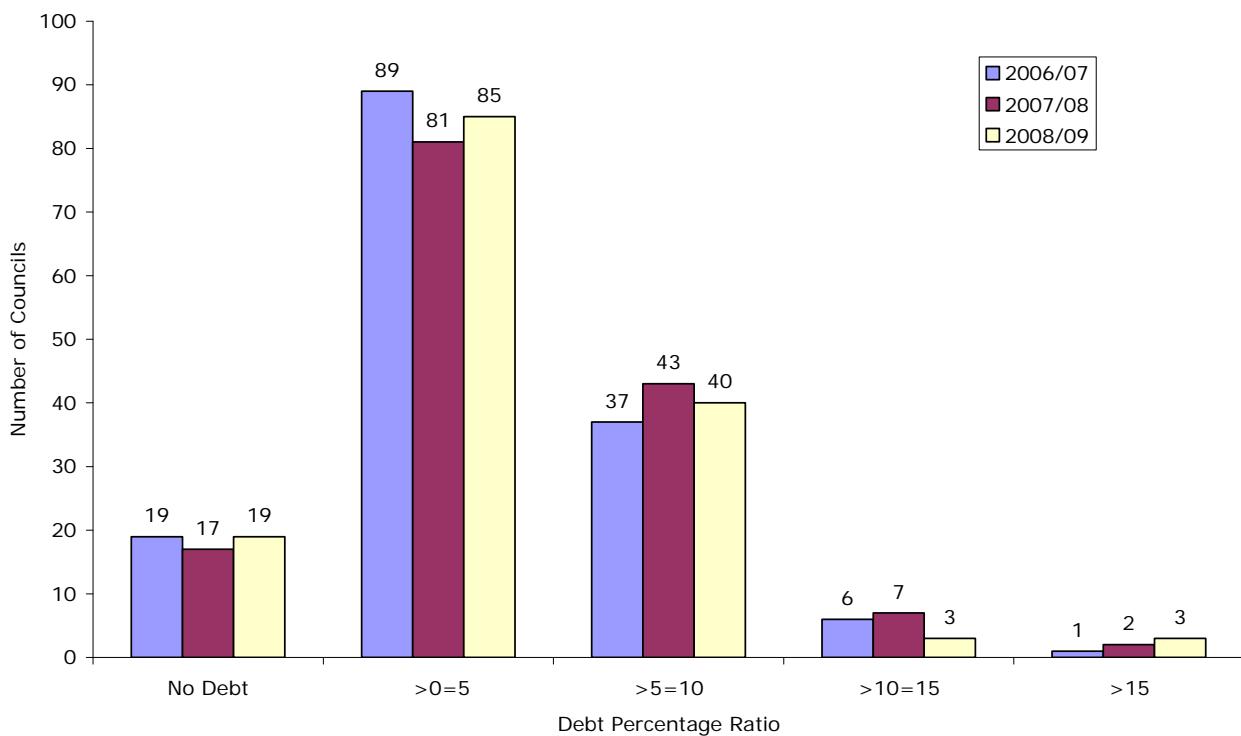

In 2008/09, of the 11 categories of councils, group 5 had the highest average debt service ratio of 8.45% and group 1 had the lowest average ratio with 0.00%.

## KEY PERFORMANCE INDICATOR

### 2.7 Capital expenditure ratio

Councils control and have responsibility for assets such as roads, stormwater drainage, sewerage/water schemes, buildings and equipment. They need to ensure that operating and community assets are managed effectively and efficiently to meet community services expectations. An indication of good asset management is whether asset maintenance and replacement is keeping up with depreciation.

This indicator assesses a council's ability to replace or add to capital assets compared with the consumption (depreciation) of assets. It does not include land, water and sewerage assets.

The formula used for this indicator is:

$$\frac{\text{Total 2008/09 infrastructure, property, plant and equipment} - \text{total}}{\text{2007/08 infrastructure, property, plant and equipment} \times 100} \\ \underline{\underline{2008/09 \text{ depreciation expense}}}$$

Some factors affecting this indicator are:

- the capital expenditure policy
- the valuation methodology
- one off changes to asset base
- the depreciation rate used.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

A ratio of 1:1 indicates that the increase in asset valuation equals the amount of depreciation and impairment. Another way to view the 1:1 ratio is a dollar used to purchase a capital asset equals a dollar spent on depreciation and impairment. An increase in the capital expenditure ratio indicates councils acquired or replaced assets faster than they were consumed (depreciated). The ratio will generally be greater for 'growth' councils that are acquiring assets or building infrastructure. The jump in 2008 reflects the first year councils' assets were revalued and recorded at fair value.

TABLE B2.71

# Note Council has moved into a new group during the three year period. Group averages for 2008/09 have been adjusted to reflect the change.

**Corporate**

# Corporate

There are two key performance indicators for corporate:

- Number of equivalent full time staff
- Compliance with statutory reporting deadlines.

## KEY PERFORMANCE INDICATOR

### 3.1 Number of Equivalent Full Time Staff

Councils disclose the number of equivalent full time staff in their financial reports. This figure is based on the total number of full or part-time staff and casual staff on council's payroll on the last payday of June in each year. For example, 100 full time staff and 2 part-time staff who work 2.5 days per week equals 101 full time staff. It includes staff employed in council trading activities, such as water and sewerage.

Some factors affecting this indicator are:

- the council's budget and organisation structure
- changes in the use of casual staff
- the level of contracting out eg changes from day labour to contract work
- the type and extent of service delivery
- whether the council has created or reduced services
- boundary changes occurring during the year.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

	2006/07	2007/08	2008/09

## KEY PERFORMANCE INDICATOR

### 3.2 Compliance with statutory reporting deadlines

Councils are required to submit their annual reports to the Division of Local Government by 30 November each year. The annual report must include a State of the Environment (SoE) report. The SoE report is often submitted as a separate document due to its size or because it has been prepared as a regional SoE report with other councils.

In addition the annual report must include a statement on the council's performance in relation to access and equity activities to meet residents' needs. Access and equity activities are any activities that aim to promote social justice and enhance community well-being.

A copy of the council's audited financial reports and the auditor's report must be sent to the Chief Executive, Division of Local Government, and to the Australian Bureau of Statistics as soon as practicable after receiving the auditor's report (no later than 7 November). Councils must also include a complete copy of the audited financial report in their annual report.

The Chief Executive, Division of Local Government, may approve an extension of time for completing the financial report. If an extension has been granted for the financial report, the due date will be amended.

This indicator highlights the level of compliance by councils with the deadlines for submitting their annual reports, including SoE reports and a statement on the council's performance in relation to access and equity activities and audited financial reports.

As the Government's Integrated Planning and Reporting reforms are being implemented by councils in stages, the Division is no longer reporting on compliance with social/community plan reporting requirements. All councils are scheduled to have commenced operating under the Integrated Planning and Reporting framework by 2012/13. Appropriate compliance indicators will be introduced after that time.

Some factors affecting this indicator are:

- how efficiently the planning and reporting process is managed
- the efficiency of data management, including record keeping
- delays in receiving component sections eg the audited financial reports
- the availability of staff
- technical delays in publication.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

##### Annual reports and SoE reports

In 2008/09, the percentage of councils that submitted their annual reports and SoE reports by the due date was 81.6% and 88.8% respectively.

In 2007/08, the percentage of councils that submitted their annual reports and SoE reports by the due date was 67.1% and 69.1% respectively.

##### Access and equity statements

In 2008/09 88.8% of councils included access and equity statements in their annual reports.

## Financial reports

In 2008/09, 96.7% of councils met the due date for submitting financial reports. Seven extensions were granted. Four councils met the revised deadline.

In 2007/08, 92.1% of councils met the due date for submitting financial reports. Thirty two extensions were granted. Twenty three councils met the revised deadline.

In previous comparative publications, councils submitting annual reports, state of the environment reports, and financial reports after the due date were published as a measurement of the number of weeks they were submitted late to the Division. In this publication all reports, statements and plans will be published as "Y", for yes, received on time, or "N", for no, not received on time. Subsequently, presentation of the statutory reporting KPI tables is consistent and easy to read.

### Compliance with statutory reporting deadlines

# Note Council has moved into a new group during the three year period. Group averages for 2008/09 have been adjusted to reflect the change.

# Environmental management and health services

The sustainable management of natural resources, the protection of the environment and the maintenance of public health are key council responsibilities.

Councils with smaller populations will generally have higher costs per capita than councils with larger populations, due to economies of scale, i.e. the decrease in unit cost of a product or service resulting from large-scale operations.

There is one key performance indicator for environmental management and health services.

## KEY PERFORMANCE INDICATOR

### 4.1 Environmental management and health expenses per capita

This indicator measures the amount spent on environmental management and health per head of population.

The formula used for this indicator is:

$$\frac{\text{Total environmental management and health expenses}}{\text{Estimated resident population within council boundaries}}$$

Some factors affecting this indicator are:

- the number of environmental management and health staff employed
- council policies about regulation
- changes in population
- the land usage mix
- socioeconomic factors
- the extent to which State legislation is applicable
- changes in council cost allocation practices
- short term programs.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

The total environmental management and health expenses were \$174.4 million for 2006/07, \$186.9 million for 2007/08 and \$206.8 million for 2008/09.

# Note Council has moved into a new group during the three year period. Group averages for 2008/09 have been adjusted to reflect the change.

# Recreation and leisure services

Councils play a significant role in the provision of recreation and leisure services. They provide and/or maintain parks, playing fields, swimming pools, beaches, walking and bicycle tracks, tennis courts and multi-purpose recreation facilities. They also fund, assist and provide information to the community about sport and recreation organisations.

Councils with smaller populations will generally have higher costs per capita than councils with larger populations, due to economies of scale, i.e. the decrease in unit cost of a product or service resulting from large-scale operations.

Councils are encouraged to develop and implement strategies that will result in more people becoming physically active.

There is one key performance indicator for recreation and leisure services.

## KEY PERFORMANCE INDICATOR

### 5.1 Net recreation and leisure expenses per capita

Councils have a greater opportunity to receive revenues from recreation services than from the other services included in this publication. This indicator therefore measures the calculated net amount spent on recreation and leisure services per head of population.

The formula used for this indicator is:

$$\frac{\text{Net recreation and leisure expenses}}{\text{Estimated resident population within council boundaries}}$$

Some factors affecting this indicator are:

- the size, type and number of facilities
- the adoption of the user pays principle
- the nature of section 94 contributions
- the population mix
- the available open space and natural resources eg beaches and bushland
- the amount of non-resident usage eg tourism
- changes in council cost allocation practices
- short term programs.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

The total net recreation and leisure expenses were \$492.1 million for 2006/07, \$522.3 million for 2007/08 and \$577.2 million for 2008/09.

**TABLE 5.11 Range of net recreation and leisure expenses per capita in NSW**

**Data sources for this indicator:** council financial reports: #special schedule 1, revenues and expenses from continuing operations – recreation and culture, swimming pools, sporting grounds, parks and gardens (lakes) and other sport and recreation. The estimated resident population within council boundaries is the preliminary figure calculated by ABS for 30 June 2008.

**Note** #special schedule 1 is not audited.

# Note Council has moved into a new group during the three year period. Group averages for 2008/09 have been adjusted to reflect the change.

# Community services

Councils provide facilities such as community centres and halls, senior citizen centres, aged care centres, childcare centres and youth centres. They employ community development staff and provide services for groups in the community with specific needs eg the aged, people with disabilities, Aboriginal and Torres Strait Islanders, and people from diverse cultural and linguistic backgrounds.

Councils with smaller populations will generally have higher costs per capita than councils with larger populations, due to economies of scale, i.e. the decrease in unit cost of a product or service resulting from large-scale operations.

There is one key performance indicator for community services.

## KEY PERFORMANCE INDICATOR

### 6.1 Community services expenses per capita

This indicator measures the amount spent on community services per head of population.

The formula used for this indicator is:

$$\frac{\text{Total community services expenses}}{\text{Estimated resident population within council boundaries}}$$

Some factors affecting this indicator are:

- the number of community services staff employed
- the number and range of community services provided
- the population mix
- the availability of funding
- socioeconomic factors
- council policies the amount of non-resident usage eg tourism
- changes in council cost allocation practices
- short term programs.

#### Comparative performance for 2006/07, 2007/08 and 2008/09

The total community services expenses were \$392.1 million for 2006/07, \$409.4 million for 2007/08, and \$447.5 million for 2008/09.
